

aivika Capture Pro

The Aivika Capture Pro picks up where the Aivika Capture left off. The Aivika Capture Pro can capture documents from network scanners that supports TWAIN. It also lets you preview the document, before sending it to ScannerVision. In addition, this pack contains a printer driver that allows you to send documents from any application. The Aivika Capture Pro contains everything included in the Aivika Capture (File Explorer Extension and Outlook Plugin) with the addition of Aivika Desktop Client Pro and Print to ScannerVision.

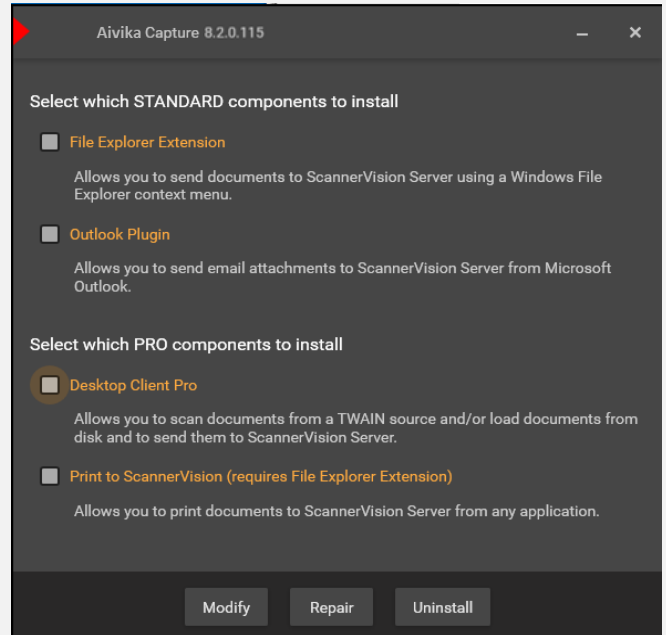

Introducing Aivika Capture Pro

Aivika Capture Pro consists of Aivika Capture, and 2 additional products: Aivika Desktop Client Pro and Print to ScannerVision.

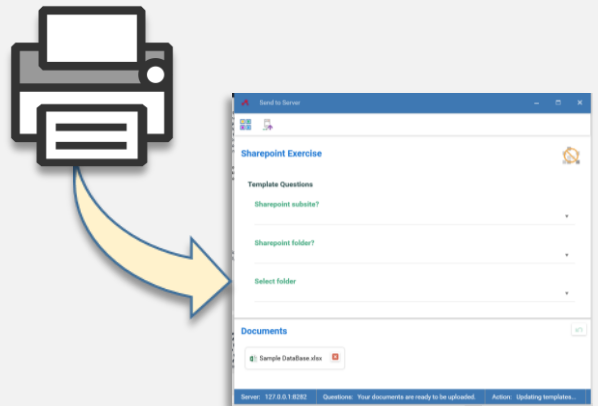

Aivika Desktop Client Pro

Desktop Client Pro is an evolution of the previous Desktop Client. With the Desktop Client Pro it is possible to send documents from a TWAIN source and/or load documents from disk and to send them to ScannerVision. Desktop Client Pro allows you to preview documents with hundreds, even thousands of pages much quicker than before. From there, it will be the same experience as working with your MFP client. You can select a workflow template, answer questions, and send documents. If the document is already a PDF, you can now bypass any image processing in ScannerVision and retain the original PDF's format and size. The same applies to Word, Excel, and other supported file types.

Print to ScannerVision

Print to ScannerVision allows you to send documents to ScannerVision from any application which supports Windows printing. This means that you can send any file, from any application, even if its file type is not an image or document type supported by the other products of Aivika Capture Pro. Print to ScannerVision is installed on your system as a printer. You can send a document to ScannerVision in the same way as you normally would print a document. As with the Aivika Desktop Client Pro, you will get to see the workflow templates that are assigned to you, and you will be able to answer questions and provide metadata to the document.

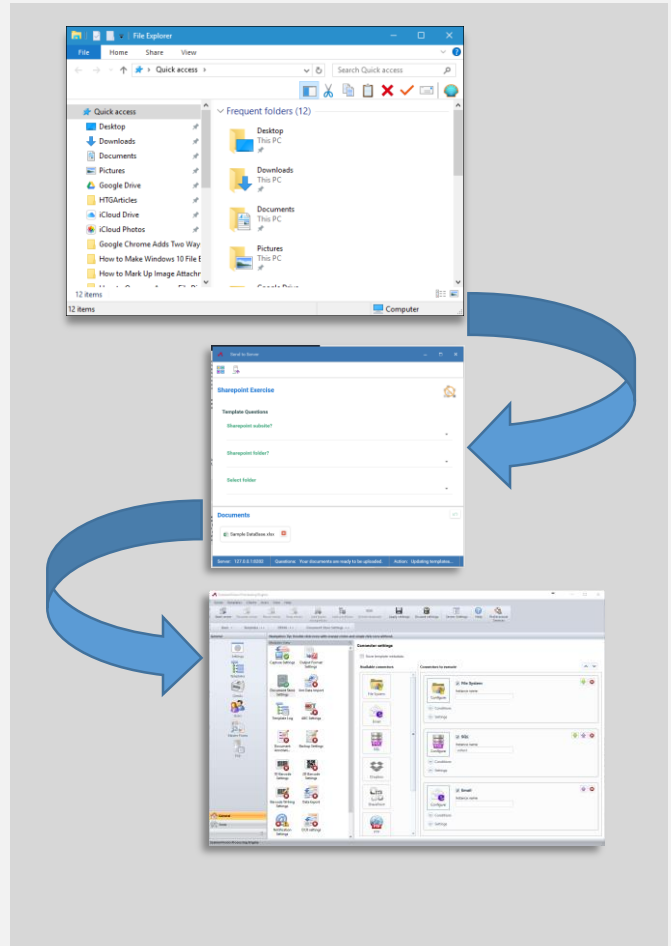

aivika Capture Pro

With the Aivika Capture Pro you also get the benefits of the Aivika Capture and its products: File Explorer Extension and Outlook Plugin. The main advantage of Aivika Capture Pro is that you now have all the tools to send a document from any location and source on your system, in the shortest way possible. Aivika Capture Pro will integrate perfectly into your daily document tasks, and save you time when processing these documents.

Any business critical documents that need to be scanned in order to be compliant with your business operations can benefit from this quick and easy process. These documents include, but not limited to:

- Invoices
- Contracts
- Purchase Orders
- ID Documents
- Engineering Drawings
- Product Specification
- Certificates
- Correspondence

By having ScannerVision as your scan solution all your paper and digital documents will be stored, searched and retrieved easily, quickly and reliably

Your benefits at a glance:

- Send documents directly from File Explorer, Outlook and any application that supports printing
- Ability to preview large documents
- Dynamic data retrieval and population of picklists
- Option to bypass any image processing and keep original document format
- Send multiple documents in one process
- Support mostly used file types
- Utilize authentication
- Auto update feature to automatically keep the application up to date

Supported file types:

.pdf, .doc, .docx, .xls, .xlsx, .tif, .tiff, .jpg, .jpeg, .png, .bmp, .ps

Requirements:

ScannerVision V8.3.0.591 or higher
HPN >= V8.1.1.129 or higher
