

Document Composition

Structure, layout and compose the content of your document.

Structured Document Composition

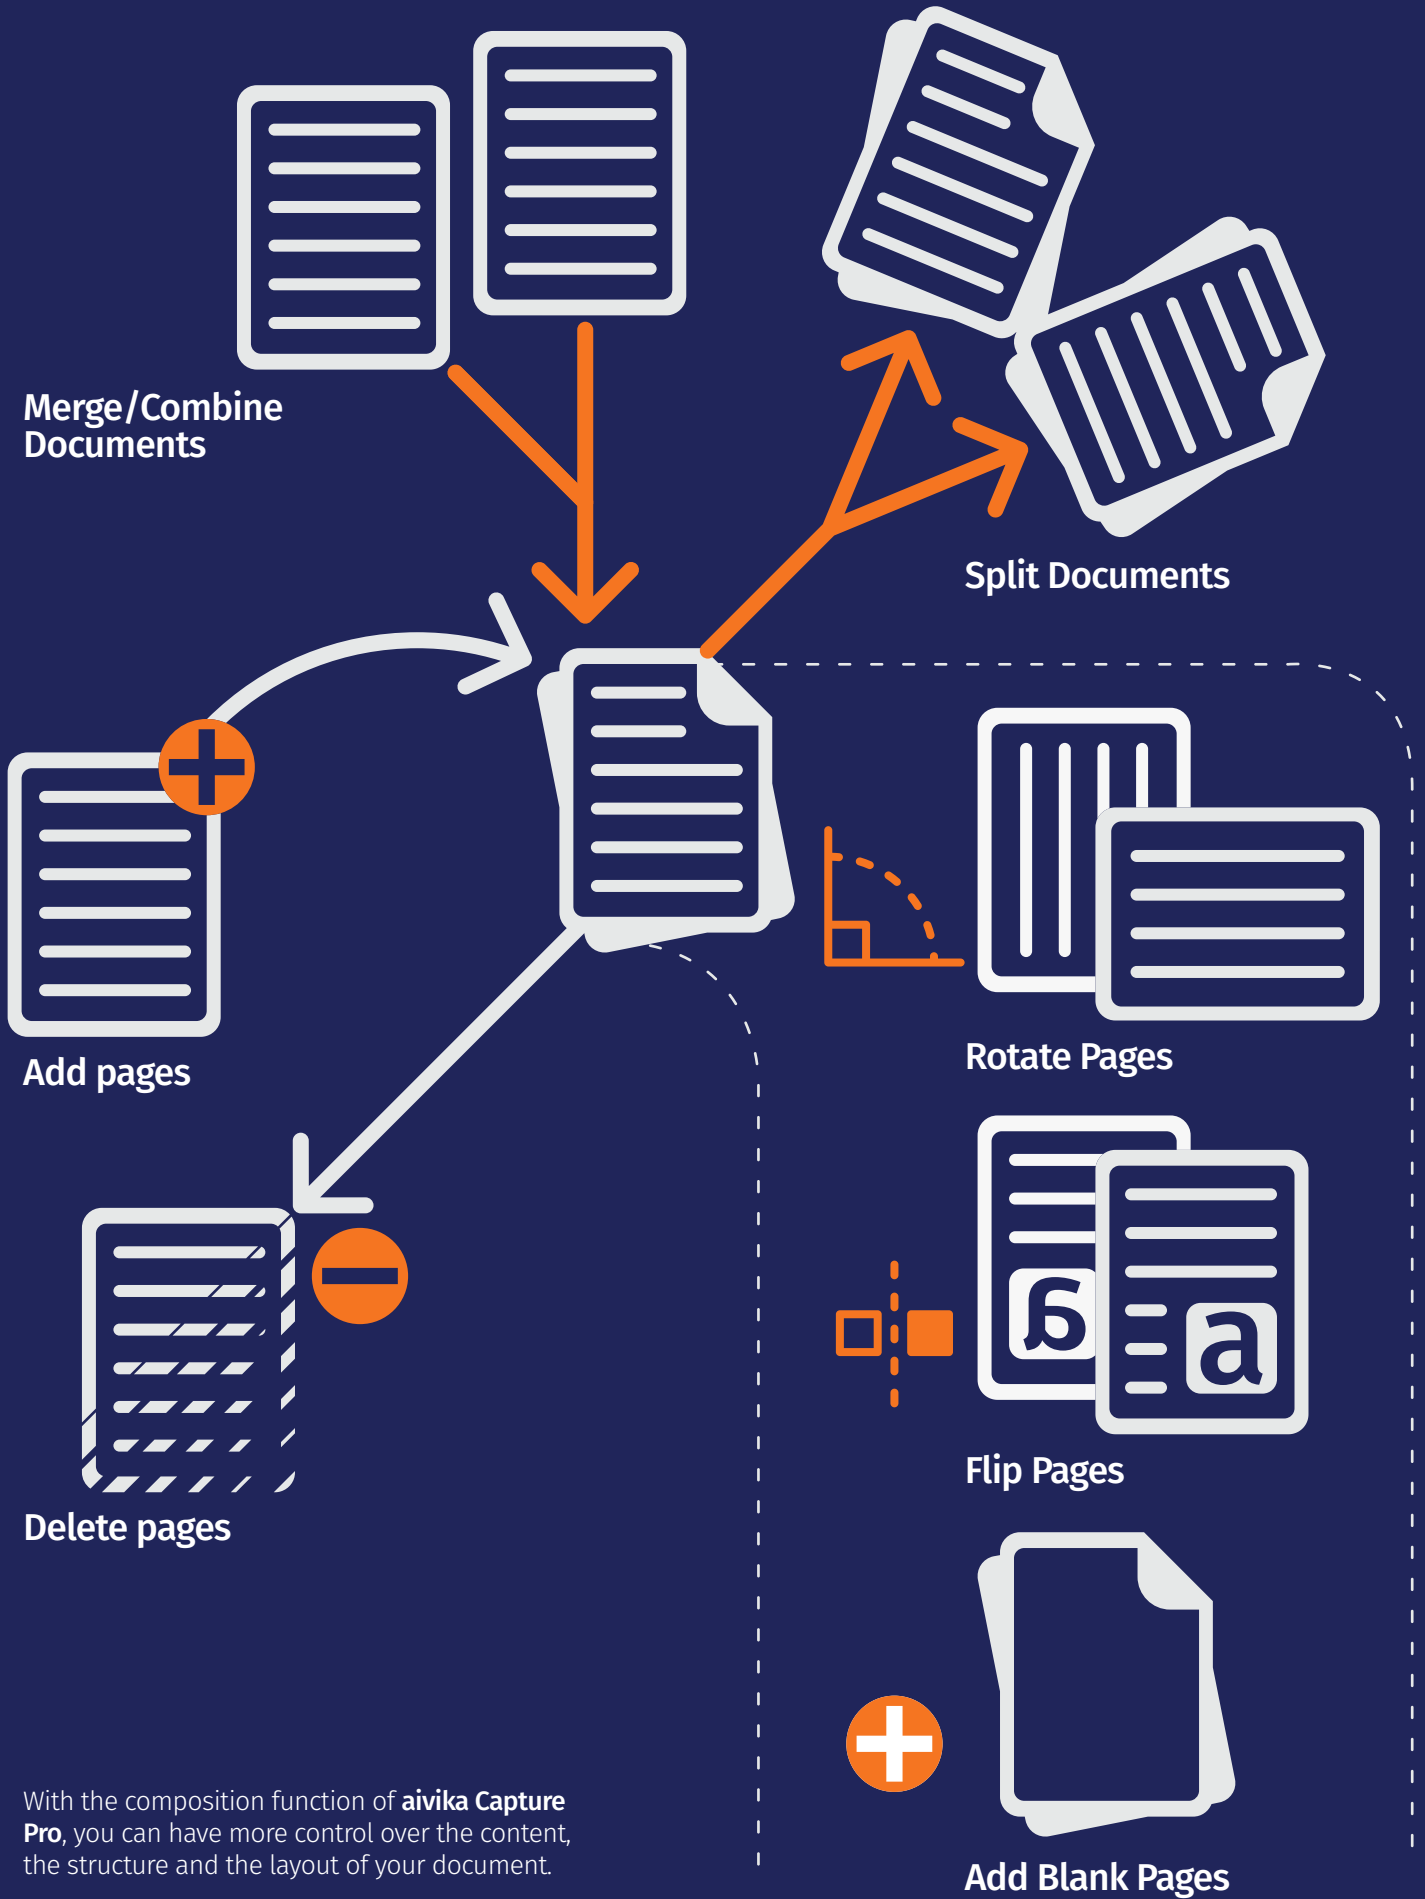

Do more with the composition of your document.

The Document Composition function in **aivika Capture Pro** not only allows you to compose a single document out of several individual documents, but also to split a single document into multiple documents.

You can also delete, rotate, flip and insert blank pages.

The composed document(s) can then be saved to disk from where it can be uploaded to the **ScannerVision™** server.

With aivika, less is more.

With the composition function of **aivika Capture Pro**, you can have more control over the content, the structure and the layout of your document.
