

Installation Options

Stand-alone, Connected Desktop or
Terminal Server.

More options
to enjoy the
power of
ScannerVision™
engine

Multiple ways of leveraging the
processing power of **ScannerVision™**.

aivika Capture Pro can be installed in different modes:

Stand-alone Mode

aivika Capture Pro can be used as a stand-alone scanning and document composition tool that gives you all the functions and features of the connected version except for the ability to capture metadata along with the document and uploading it to the **ScannerVision™** server.

Connected Desktop Mode

In Connected Desktop Mode **aivika Capture Pro** connects to a **ScannerVision™** server. This mode allows you to capture document metadata along with the document you want to upload to the **ScannerVision™** server.

Terminal Server Mode

aivika Capture can be installed on a Microsoft Terminal Server with all the functions and features of the normal desktop version. Your **ScannerVision™** must include the User Based Licensing module with the number of concurrent users you want to support included in the license.

With the new and improved User Import functionality in **ScannerVision™** Version 9 you can have your Terminal Server environment up and running in no time.

With aivika, less is more.

Stand-alone Mode

Utilize the scanning and document composition tool for a more productive document process flow.

Connected Desktop Mode

Capture, compose your document, capture metadata and upload to **ScannerVision™** server for processing.

Terminal Server Mode

By integrating into your Terminal Server environment, you can now enjoy the power of **ScannerVision™** engine without much hassle.
