PDF Signing

User-based Licensing

User Import & Sync

Zonal Barcode Recognition

ScannerVision™ 9

In the previous version of **ScannerVision™**, we introduced the enhanced Parallel Processing Engine that allows the application to process multiple documents at the same time. Doubling the number of document processors, cutting the processing time roughly in half, saving even more valuable time and money.

With the objective of bringing you a productive, efficient and affordable solution, we at **ScannerVision™** are proud to announce the release of **version 9**. It will enable you to be more efficient by automating more of your document processes with its new features.

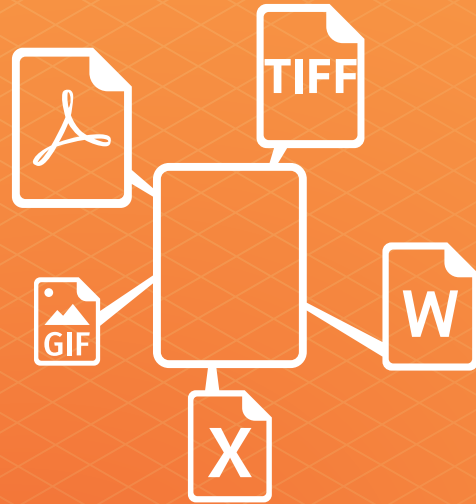

- **PDF Signing**
Enables you to Sign any document digitally while meeting and exceeding compliance, regulations and standards.
- **User-based Licensing**
Two users to share one license whenever one of the users is inactive
- **User Import & Sync**
Adding users just got easier. This feature enables you to import users from Microsoft Active Directory (AD), CSV (CSV) files and databases (DB).
- **Zonal Barcode Recognition**
Enables you to capture and process all legible barcodes on a single page with just one scan.

Automated Document Processes

Installation Options

Document Composition

aivika 9

From your network scanners to your Microsoft Outlook, **aivika** has always been a bridge between your digital document, your workflow environment and **ScannerVision™** Engine.

In this new release, **aivika** version 9 will be working harder for you so that you can allocate your time to more productive tasks. It is more powerful than ever, and it enables you to structure your document better for your document workflow. To top it off, you can now have multiple options to enjoy its power.

• Automated Document Processes

You no longer have to allocate time going through the tedious process of importing, this new feature does most of the job for you.

• Document Composition

This new feature enables you to compose your document the way you want to. Merging or splitting pages, adding or removing pages and even flipping and rotating them.

• Installation Options

Every business environment is unique and is an ecosystem by itself. Now, **aivika** is more flexible and can be installed in various modes.
